

PRESCIENT SA INCOME PROVIDER FUND (A2)

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund aims to return CPI + 3% per annum through a full interest rate cycle while providing stability by aiming never to lose capital over any rolling 3 month period.

INVESTMENT PROCESS

This Fund invests in local money market, bonds, inflation-linked bonds, preference shares and derivatives to meet the investment objectives. Fund performance can be generated from taking interest rate views or duration, yield enhancement via credit instruments, asset allocation between income producing asset classes and also via the use of derivatives.

WHO SHOULD INVEST

Investors seeking stable real returns and aiming to maximise income via exposure to primarily the South African Money and Bond markets. This Fund is suitable to investors with a short- to medium-term investment horizon and is Regulation 28 compliant.

RISK INDICATOR DEFINITION

These portfolios typically have no or low equity exposure, resulting in higher interest yields and stable capital values with the probability of capital losses over the shorter term (3 months) highly unlikely. These portfolios typically target returns in the region of 1% – 3% above inflation before tax over the long term.

RISK INDICATOR

ANNUALISED PERFORMANCE (%)			CUMULATIVE PERFORMANCE		
ANNUALISED PERFORMANCE (%)			RISK AND FUND STATS		
	Fund	Benchmark	Current

FUND COMMENTARY

April saw some calm return to local Fixed Income markets, with the ALBI returning 1.37% for the month. The Fund was ahead of its benchmark for the month. On the global macro front, recent communication from Federal Open Market Committee (FOMC) participants acknowledged substantial advancements toward the committee's two percent inflation target over the past year, notwithstanding firmer-than-expected inflation readings in recent months. While some participants highlighted the broad-based nature of these inflationary increases, caution was expressed regarding the potential influence of residual seasonality on early-year inflation data. Overall, participants reiterated their vigilance toward inflationary risks, while anticipating some irregularities in monthly inflation indicators during the process of inflation returning to target levels. Participants assessed economic growth to decelerate from the robust pace observed in the previous year. This has seen market pricing a somewhat more dovish roadmap for US rates for the year.

In South Africa, the market has moved to price in something similar, with the first rate cut again priced for Q4 2024. Currently, the market is only reflecting a minimal cutting cycle in pricing, barely reaching 0.25%. Given the movement in the SA yield curve, we are favouring floating rate exposure in the 3-year area of the yield curve with our fixed rate exposure focusing on the 10-year area of the yield curve.

The Fund forward yield remains attractive at 10.73%. The Fund has an interest rate duration of 1.51 years and a total Fund duration (including ILBs) of 1.80 years.

The Fund was ahead of its benchmark for the Month. We saw good contributions from all components of the portfolio. The current risk in the portfolio is in line with the Fund's risk objective and we see the Fund well positioned to deliver on its return objectives.

PRESCIENT SA INCOME PROVIDER FUND (A2)

GLOSSARY

Annualised performance: Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Current Yield: Annual income (interest or dividends) divided by the current price of the security.

CPU: Cents Per Unit to the Glossary

Alpha: Denotes the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

Average Duration: The weighted average duration of all the underlying interest bearing instruments in the Fund.

Forward Yield: The Forward Yield is the expected combined income of the instruments in the portfolio over the next year expressed as a percentage of the current value of those instruments.

Fund Specific Risks

Default Risk: The risk that the issuers of fixed income instruments may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

% Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Derivative counterparty risk: A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Information Disclosure

The portfolio has adhered to its policy objective and there were no material changes to the composition of the portfolio during the quarter.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.
