

STONEHAGE FLEMING GLOBAL MULTI-ASSET PORTFOLIO

30 September 2025 Minimum Disclosure Document & General Investor Report

INVESTMENT OBJECTIVE

To preserve capital in the medium term and to achieve capital growth in real terms over the longer term. The fund has adhered to its policy objective as stated in the Supplement.

INVESTMENT POLICY

In seeking to achieve its investment objective, the Fund will invest predominantly in a range of underlying collective investment schemes which comply with the Central Bank's requirements as regards investment by a UCITS in other collective investment schemes and which qualify for UK reporting status where such collective investment schemes provide exposure to a portfolio of assets comprising mostly global equities and equity related securities (which may be listed or traded on Recognised Exchanges or unlisted), cash and bonds (including corporate debt securities and bonds issued by sovereign, supranational entities and/or corporate issuers rated investment grade at time of purchase from either Moody's or another generally recognised international rating agency).

COMMENTARY

The fund rose in September and outperformed its benchmark. Global equities advanced during the month, with the majority of gains driven by the US, Asia, and emerging markets. The strongest performing sectors were Communication Services and Technology, once again led by mega-cap technology names that continue to benefit from AI-related optimism and resilient demand for semiconductors and cloud services.

Equity strategies that performed well included our Asia manager, Veritas and US small cap manager, Driehaus. Gold continued to have another strong month off concerns of a US government shutdown and continued demand for the precious metal. Fixed income returns were more modest with all positions delivering positive absolute returns.

INVESTOR PROFILE

The Fund is appropriate for all investor types, including those with only a basic knowledge of funds. It is compatible with investors who do not need a capital guarantee (investors must be prepared to accept fluctuations in the value of capital, including the ability to bear 100% capital loss) and are looking for capital growth.

Due to the volatility of markets, investors should be willing to accept price fluctuations in exchange for the opportunity of potentially higher returns. This is a long-term investment and investors should have an investment time horizon of at least 5 years. The recommended holding period does not provide any guarantee that the objective will be achieved. This product is eligible for all distribution channels (e.g. investment advice, portfolio management, non-advised sales and pure execution services).

The Fund is unlikely to be appropriate for those who:

- Are looking for full capital protection or full repayment of the amount invested, and those who want a guaranteed return
- Have no risk tolerance
- Who are unwilling to accept price fluctuations (volatility) in the value of the Fund
- Do not intend to invest for the long term

PAST PERFORMANCE SHOULD NOT BE USED AS A GUIDE TO FUTURE PERFORMANCE

⁴ The Investment Management Fee is included in the Total Expense Ratio ("TER") and is not in addition to the TER. The TER expresses the overall costs of running the Stonehage Fleming Global Multi-Asset Portfolio (the "Fund") as a percentage of the value of the assets of the Fund. It comprises the Investment Management Fee and other additional charges including, but not limited to, the charges of the Manager, Administrator, the Custodian, the Directors and any appointed Paying Agent as well as regulatory, company secretarial, statutory, auditing, listing, Governmental and legal costs. It does not include portfolio transaction costs ("TC")⁵. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. The Total Investment Charges ("TIC")⁶ comprise both the TER and the TC.* (see footnote overleaf)

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk and reward profile is based on the B share class.

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 5 because its volatility has been estimated as above average. The classification is based on estimated historical data of a relevant benchmark and may not be a reliable indicator of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing.

Investments in underlying funds contain the same market and liquidity risks associated with the underlying investments.

The Fund may be subject to a liquidity risk due to the manner and timing of potential redemptions from the underlying funds. Underlying funds may be entitled to delay acceptance of redemption requests or payment of redemption proceeds from the Fund.

The Fund may be subject to valuation risk due to the manner and timing of valuations of the Fund's investments.

For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors' which may be obtained from the address in 'Practical Information' overleaf.

*From 1 January 2022 to 31 December 2024, 0.67% of the value of class B and 0.67% of the value of class C was incurred as expenses relating to the administration of the financial product. 0.00% of the value of the financial product was incurred as costs relating to the buying and selling of the assets underlying the financial product. Therefore, 0.67% of the value of class B and 0.67% of the value of Class C was incurred as costs relating to the investment of the financial product.

DISTRIBUTIONS

	Class C	Distribution Date

2022 GBP per share	0.5695	18 January 2023
2023 GBP per share	1.2934	16 January 2024
2024 GBP per share	1.6998	16 January 2025

Class B is non-distributing and therefore no distribution data is available.

RISK FACTORS

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund may enter into derivative agreements with counterparties, and consequently there is a risk that a counterparty may fail to meet its obligations. This may lead to delays in the Fund receiving amounts due to it, receiving less than is due or receiving nothing. Investments in underlying funds contain the same market and liquidity risks associated with the underlying investments. The Fund may be subject to a liquidity risk due to the manner and timing of potential redemptions from the underlying funds. Underlying funds may be entitled to delay acceptance of redemption requests or payment of redemption proceeds from the Fund. The Fund may be subject to valuation risk due to the manner and timing of valuations of the Fund's investments. For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors'.

Changes in the rates of exchange between currencies may cause the value of investments to go up or down in the reporting currency. In general, underlying investments denominated in foreign currency are not hedged back into the reporting currency. Among the factors that may influence currency values are trade balances, the levels of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments. Values may also be affected by developments relating to controls and restrictions on foreign currency remittance of proceeds of investments in a non-sterling jurisdiction.

All investments risk the loss of capital. No guarantee or representation is made that the Fund will achieve its investment objective. The value of investments may go down as well as up and the distributions can also go down or up and you may not receive back the full value of your initial investment. The risks outlined here are some of the more specific risks applicable to investment in the Fund and investors' attention is drawn to Appendix II of the Prospectus which provides more information on the types of risk factors investors should consider.

Whilst every effort is made to provide investors with accurate and up to date information, some of the information may be rendered inaccurate by changes in applicable laws and regulations. For example, the levels and bases of taxation may change. No information in this document should be interpreted as investment advice. If you feel unsure about the suitability of this investment for you, please consult with a professional financial adviser.

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending.

The portfolio may include foreign investments and the following additional risks may apply: liquidity constraints when selling foreign investments and risk of non-settlement of trades; macroeconomic and political risks associated with the country in which the investment is made; risk of loss on foreign exchange transactions and investment valuation due to fluctuating exchange rates; risk of foreign tax being applicable; potential limitations on availability of market information which could affect the valuation and liquidity of an investment. All of these risks could affect the valuation of an investment in the fund.
