

Objective

- The Fund seeks a high rate of total return consistent with long term preservation of capital.

Strategy

- The Fund invests in a diversified portfolio of bonds and other debt instruments of issuers from at least three different countries, including emerging market countries. The Fund will invest in both U.S. dollar-denominated and non-U.S.-currency-denominated debt instruments, including, but not limited to, government and government-related obligations, mortgage- and asset backed securities, corporate and municipal bonds, repurchase agreements, and other debt securities.
- The proportions of the Fund's assets held in the various debt instruments will be revised in light of Dodge & Cox's appraisal of the global economy, the relative yields of securities in the various market sectors and countries, the potential for a currency's appreciation, the investment prospects for issuers, the countries' domestic and political conditions, and other factors. In selecting securities, Dodge & Cox considers many factors, including, without limitation, yield-to-maturity, covenants, credit quality, liquidity, call risk, and capital appreciation potential.
- The Fund may enter into various currency, interest rate, and credit-related derivatives, including forwards, futures, and swaps.

Investment Manager

- Established in 1930 in San Francisco, Dodge & Cox is one of the most experienced and largest money management firms in the world. We provide professional investment management services to individuals, advisors, corporations, retirement funds, and tax-exempt institutions through separate accounts, U.S. mutual funds, and the Dodge & Cox Worldwide Funds. The Global Bond Fund is managed by the Global Fixed Income Investment Committee, whose six members' average tenure at Dodge & Cox is 20 years.

^(a) Portfolio turnover is calculated as the lesser of portfolio purchases or sales divided by the average portfolio value.

^(b) Dodge & Cox has voluntarily agreed to reimburse the Fund for all ordinary expenses to the extent necessary to limit aggregate annual ordinary expenses to 0.45% of the average daily net assets of each share class. Dodge & Cox may terminate or modify this agreement upon 30 days' notice to shareholders.

^(c) Distribution yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the current share price. The distribution yield is the same as the underlying yield. Investors may be subject to tax on their distributions.

^(d) Interest rate derivatives reduce total Fund duration by 2.2 years (i.e., total Fund duration is 5.7 years without derivatives).

^(e) The Fund may classify an issuer in a different category than the Bloomberg Barclays Global Aggregate Bond Index. The Fund generally classifies a corporate issuer based on the country of incorporation of the parent company, but may designate a different country in certain circumstances.

^(f) Non-USD currency exposure for the Fund reflects the value of the portfolio's non-U.S. dollar denominated investments, as well as the impact of currency derivatives.

^(g) The Fund's portfolio holdings are subject to change without notice. The mention of specific securities is not a recommendation to buy, sell, or hold any particular security and is not indicative of Dodge & Cox's current or future trading activity.

^(h) The credit quality distributions shown for the Fund and the Index are based on the middle of Moody's, S&P, and Fitch ratings, which is the methodology used by Bloomberg in constructing its indices. If a security is rated by only two agencies, the lower of the two ratings is used. Please note the Fund applies the highest of Moody's, S&P, and Fitch ratings to comply with the quality requirements stated in its prospectus. On that basis, the Fund held 9.1% in securities rated below investment grade. The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund or its shares.

⁽ⁱ⁾ Region, sector, and quality weights exclude the effect of the Fund's derivative contracts.

^(j) Net Cash & Other includes cash, short-term investments, derivatives, receivables, and payables.

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Fund performance changes over time and currently may be significantly lower than stated above. Visit the Fund's website at dodgeandcoxworldwide.com for current month-end performance figures.

RISK AND REWARD PROFILE

◀ Lower Risk Higher Risk ▶
 ◀ Typically Lower Rewards Typically Higher Rewards ▶

1	2	3	4	5	6	7

This risk and reward indicator is designed to provide you with a measure of price movement based on historical data over the past five years. As the Fund does not have sufficient historical data available to cover the full five-year period, simulated data based on a representative portfolio and benchmark has been used for the periods when the Fund had not yet launched.

The indicator may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

The Fund invests mainly in various high-quality debt securities with exposure to various countries and currencies. Such securities have historically been subject to price movements, generally due to interest rates or movements in the bond market. As a result, the performance of the Fund can fluctuate over time.

The Fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- **Credit risk:** a security's price may decline due to deterioration in the issuer's or guarantor's financial condition, or that the issuer or guarantor may fail to repay interest and/or principal in a timely manner;
- **Liquidity risk:** the Fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security;
- **Currency risk:** the risk of loss arising from exchange-rate fluctuations or exchange control regulations;
- **Counterparty risk:** the Fund may suffer losses if the parties it trades with cannot meet their financial obligations;
- **Interest rate risk:** changes in interest rates may negatively affect the value of the Fund;
- **Low-rated bonds risk:** lower-rated securities may yield a higher level of current income than higher-rated securities, but generally have greater credit risk, more price volatility, and less liquidity;
- **Emerging markets risk:** the Fund may invest in countries that have less developed political, economic, legal, and regulatory systems than more developed countries; and
- **Derivatives risk:** investment in derivatives may create leverage and may cause the Fund to lose as much as or more than the amount invested.

More information on the risks of investing in this Fund can be found in the Fund's prospectus in the sections titled "Investment Risks and Special Considerations" and "Characteristics and Risks of Securities and Investment Techniques".

IMPORTANT INFORMATION

This document serves as the Minimum Disclosure Document in South Africa as required by the Advertising, Marketing and Information Disclosure Requirements for Collective Investment Schemes published by the South African Financial Services Board.

The Dodge & Cox Worldwide Funds plc – Global Bond Fund (the "Fund") is a Collective Investment Scheme in Securities.

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of an investment may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available from Dodge & Cox Worldwide Funds plc. Neither the Fund nor its Investment Manager provides any guarantee with respect to the capital or the return of a portfolio. Dodge & Cox Worldwide Funds plc is authorised in Ireland and regulated by the Central Bank of Ireland. The sub-funds of Dodge & Cox Worldwide Funds plc available for public sale in South Africa are approved CIS in terms of the Collective Investment Schemes Control Act, No 45 of 2002. Dodge & Cox Worldwide Funds plc is an Associate Member of the Association for Savings & Investment SA (ASISA). The Fund's Directors reserve the right to close the Fund to new investors.

International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations. In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks that may increase the risk profile of the Fund and are more fully described in the Fund's prospectus.

*The Fund's total returns include dividends and interest income and reflect the deduction of expenses charged to the Fund. Index returns include dividends but, unlike Fund returns, do not reflect fees or expenses. Performance is calculated for the portfolio. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment, and dividend withholding tax. The Bloomberg Barclays Global Aggregate Bond Index is a widely recognized, unmanaged index of multi-currency, investment-grade debt securities. All returns stated in U.S. dollars unless otherwise noted.

EFFECTIVE ANNUAL COST

The Effective Annual Cost (EAC) is a measure which has been introduced to allow you to compare the cost you incur when you invest in different financial products. It is expressed as a percentage of your investment amount. The EAC is made up of four charges, which are added together, as shown in the table below. Some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the financial product at the end of the relevant periods shown in the table.

Charges	1 Year	3 Years	5 Years	10 Years
Investment Management ¹	0.79%	0.79%	0.79%	0.79%
Advice ²	0.00	0.00	0.00	0.00
Administration ²	0.00	0.00	0.00	0.00
Other ²	0.00	0.00	0.00	0.00
Effective Annual Cost	0.79	0.79	0.79	0.79

¹ The investment management charge (IMC) is equal to the sum of the Fund's total expense ratio and transaction costs. The IMC is calculated over a trailing three year period on an annualised basis and will be updated semi-annually as of 30 June and 31 December. For transaction costs that are not explicitly charged (e.g., bond spread costs, FX spread costs), a best estimate of the costs has been included in the calculation.

² No advice, administration, or other charges apply at the Fund level.

SOUTH AFRICAN REPRESENTATIVE OFFICE

Prescient Management Company (RF) (PTY) LTD, which serves as the Fund's South African Representative, is registered and approved under the Collective Investment Schemes Control Act (No.45 OF 2002) with Registration Number 2002/022560/07. The Representative's physical address is Prescient House, Westlake Business Park, Otto Close, Westlake, 7495, South Africa. Its telephone number is (021) 700 3600.

DEFINITIONS

Net Asset Value, or **NAV**, represents the assets of the Fund less its liabilities.

Net Asset Value Per Share, or **NAV Per Share**, with respect to a Class of Shares, represents the Net Asset Value of the Fund attributable to that Class divided by the number of Shares in issue of that Class.

Highest 1-year Return and **Lowest 1-year Return** show the highest and lowest annual returns of the relevant Class of Shares for any single calendar year since the inception of the Fund and are meant to show variability of return.

Average Annual Total Return is the weighted average annual compound growth rate of the Class of Shares over the performance period measured, calculated on a NAV Per Share to NAV Per Share basis.
