RISK AND REWARD PROFILE

This risk and reward indicator is designed to provide you with a measure of price movement based on historical data over the past five years.

The indicator may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

The Fund invests mainly in equity and equity-related securities of companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

The Fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- **Currency risk:** the risk of loss arising from exchange-rate fluctuations or exchange control regulations;
- **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems;
- **Liquidity risk:** the risk that the Fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security; and
- **Derivatives risk:** investment in derivatives may create leverage and may cause the Fund to lose as much or more than the amount invested.

More information on the risks of investing in this Fund can be found in the Fund's prospectus in the sections titled "Investment Risks and Special Considerations" and "Characteristics and Risks of Securities and Investment Techniques".

EFFECTIVE ANNUAL COST

The Effective Annual Cost (EAC) is a measure which has been introduced to allow you to compare the cost you incur when you invest in different financial products. It is expressed as a percentage of your investment amount. The EAC is made up of four charges, which are added together, as shown in the table below. Some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the financial product at the end of the relevant periods shown in the table.

Charges	1 Year	3 Years	5 Years	10 Years
Investment Management ¹	0.78%	0.78%	0.78%	0.78%
Advice ²	0.00	0.00	0.00	0.00
Administration ²	0.00	0.00	0.00	0.00
Other ²	0.00	0.00	0.00	0.00
Effective Annual Cost	0.78	0.78	0.78	0.78

¹ The investment management charge (IMC) is equal to the sum of the Fund's total expense ratio and transaction costs. The IMC is calculated over a trailing three year period on an annualised basis, and will be updated semi-annually as of 30 June and 31 December. For transaction costs that are not explicitly charged (e.g., bond spread costs, FX spread costs), a best estimate of the costs has been included in the calculation.

² No advice, administration, or other charges apply at the Fund level.
