

PRESCIENT GLOBAL EQUITY FEEDER FUND

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund is an actively managed global equity fund that aims to outperform MSCI World Index in Rands over time.

INVESTMENT PROCESS

The Fund is fully invested in equities and is structured to minimise the risk of underperforming the benchmark by investing in a diversity of risk premia and blending those strategies to reduce relative market risk over time. The feeder fund is invested wholly in the Prescient Global Equity Fund.

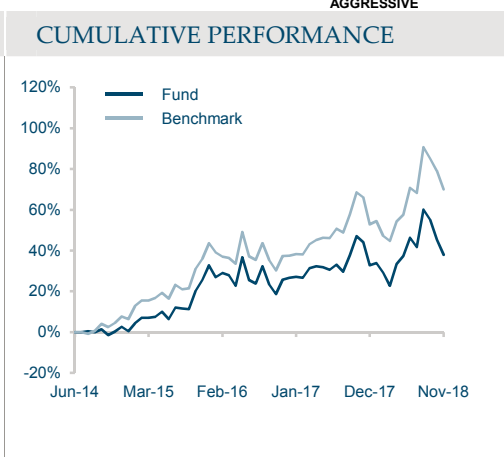

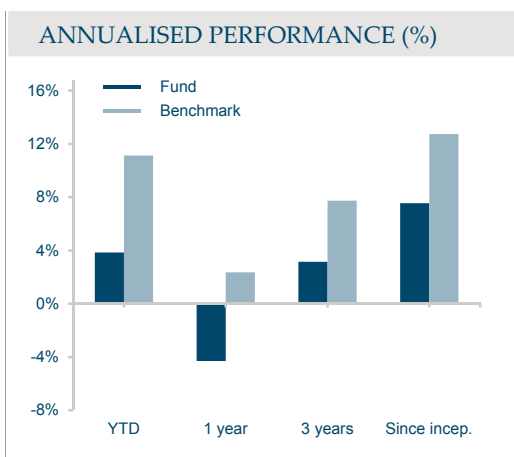

WHO SHOULD INVEST

Investors seeking growth and protection against Rand depreciation through a benchmark aware global equity fund. This Fund is suitable to investors with a long-term investment horizon who wants to invest in Rands.

RISK INDICATOR DEFINITION

These portfolios typically exhibit more volatility and potential for capital losses due to higher exposure to equities and exposure to offshore markets where currency fluctuations may result in capital losses. These portfolios typically target returns in the region of 5% - 6% above inflation over the long term.

FUND COMMENTARY

A decent rally in global markets took place as November was nearing a conclusion. Prior to this, markets flip flopped with no clear direction as the US tech sector initially sold off and then recovered strongly when bargain hunting entered markets and the US Federal Reserve hinted that US interest rates were near the neutral rate. The tech heavy Nasdaq index, which was down over -5% at one point, ended 0.34% up in November, whilst the S&P500 index rose by 1.79% over the same period. Brexit negotiations continued to weigh on the UK and the EU. After eventually managing to strike a deal, UK Prime Minister Theresa May now faces a Herculean task of getting the deal through the House of Commons, who are set to vote on the agreement on the 11th of December. European markets hence struggled with the DAX and FTSE100 indices giving back -1.66% and -2.07% respectively. Amidst the geopolitical uncertainty, the MSCI Emerging Market index (+4.06%) outperformed the MSCI World index (+0.96%). On the home front, the South African Reserve Bank hiked interest rates by 0.25%, which caught markets off guard to some degree considering the desperate need for growth domestically. Meanwhile, another cabinet reshuffle took place as tempers flared at the Zondo commission of state capture, which hints at a bumpy ride till next year's national election. The JSE All Share index decoupled from global markets by losing -3.17% in what was a tough month. Bonds rallied with the All Bond index adding 3.87% in November. However, Brent crude oil was the laggard as severe selling pressure, on the back of a diminished global growth outlook, saw a -20.75% collapse in price to end at USD59.14/bbl. The South African rand strengthened considerably moving from 14.78 to 13.86 to the dollar over the month, thus impacting South African investors by -6.23%.

Contributors to performance:

The Fund performed much in line with the MSCI World (not including emerging markets) benchmark with a performance of 0.3% for the month. Three stocks in the portfolio generated large positive gains with Abbvie (21.09%), Applied Materials (14.03%) and Caterpillar Inc (11.83%) giving strong performance.

Detractors from performance:

Underperformance was driven mostly by US and European stocks in the information technology sector once again. Nvidia continued to exhibit negative performance (-22.40%) with concerns relating to higher than expected inventories due to less uptake on graphics cards in the crypto-mining space. Target (-14.36%) and Credit Suisse (-10.31%) also disappointed. Team analysis suggests that Target and Credit Suisse no longer offer relative value to peers and have been sold out of the portfolio; we believe however that Nvidia still offers solid value and its position has been maintained.

PRESCIENT GLOBAL EQUITY FEEDER FUND

GLOSSARY

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Current Yield: Annual income (interest or dividends) divided by the current price of the security.

CPU: Cents Per Unit to the Glossary

Alpha: Denoted the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

Fund Specific Risks

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

% Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

PRESCIENT GLOBAL EQUITY FEEDER FUND

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges and which could result in a higher fee structure for the feeder fund.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
