FUND FACTS

FUND AIM

The Fund seeks to achieve capital growth and income over the long-term with a lower risk profile than equity market alternatives through investment in a range of asset classes including between 40-80% in shares of companies from around the world. The fund is actively managed. The comparator benchmarks for the fund are referenced in the Fund Information section below. They have been selected because the Investment Manager and the Manager believe that the benchmarks are a suitable comparison for performance purposes given the fund's investment objective and policy. However the Investment Manager has discretion to deviate from the benchmarks' constituents and weightings, subject to the fund's investment objective, policy and internal risk guidelines. While the benchmark indices are used as a performance comparison, portfolio construction is not constrained by them, and holdings may differ materially from those of the benchmarks.

INVESTMENT STRATEGY

The Fund seeks to achieve capital growth and income over the long-term with a lower risk profile than equity market alternatives through investment in a range of asset classes. The Fund invests globally in a combination of assets. Predominantly these are shares and company or government bonds. Shares held will satisfy Sarasin's thematic process and generally 40-80% of the Fund's assets will be invested in shares. It is not constrained by geography, sector or style but manages risk through a variety of theme characteristics. The bonds will mainly be priced in US Dollars. The Fund will not track an index. Derivatives (financial instruments whose value is linked to the expected future price movements of an underlying asset) may be used only with the aim of reducing risk or costs, or generating additional capital or income.

RISK PROFILE

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return. It is based upon how the Fund has performed in the past and you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time. The higher the rank the greater the potential reward but the greater the risk of losing money. The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Capital at risk. The value of investments and any income derived from them can fall as well as rise and investors may not get back the amount originally invested. If investing in foreign currencies, the return in the investor's reference currency may increase or decrease as a result of currency fluctuations. Past performance is not a reliable indicator of future results and may not be repeated. Forecasts are not a reliable indicator of future performance.

The Sarasin IE Multi Asset - Dynamic (USD) is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002.

Collective investment schemes are generally medium to long-term investments. The value of participatory interests (units/shares) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request from Prescient Management Company (RF) (PTY) LTD ("SA Representative") and/or Sarasin & Partners LLP ("the Investment Manager").

Prescient Management Company (RF) (PTY) LTD is registered and approved under the Collective Investment Schemes Control Act 45 of 2002. Registration Number 2002/022560/07. Registered office: Prescient House, Westlake Business Park, Otto Close, Westlake, 7945, South Africa. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request. Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. Highest and lowest is returns for any 1 year over the period since inception have been shown. NAV is the net asset value represents the assets of a Fund less its liabilities. The Investment Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Investment Manager reserves the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.

Where foreign securities are included in a portfolio there may be material risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

The fund may not be appropriate for investors who plan to withdraw their money within five years. Prospective investors should review the Prospectus carefully, including the section on 'Risk Factors', prior to making any final investment decisions. The Prospectus, the KID for the relevant class, as well as the annual and half-yearly reports, are available from the SA Representative and/or the Investment Manager on request. The fund may not be distributed to investors in jurisdictions where such distribution would be unlawful. The Investment Manager reserves the right to reject any applications from outside of the jurisdictions where the fund is registered for sale. US Persons are not permitted to subscribe for units in the fund. Fund prices are published daily and are available on our website. These are also available upon request.
