Bonds	90%
Equity	0%
<b>Total</b>	<b>100%</b>

## BOND CREDIT EXPOSURE

### Income Distribution:

March Annually – new fund

### Fund Auditors:

Ernst & Young Incorporated

### Fund Administrator:

Prescient Fund Services (Pty) Ltd

### TFSA:

Tax Free Savings Account Compliant

## FUND COMMENTARY

The SA Government 10-year yield has held up well relative to the weakness in US 10-yr Treasuries, finishing the year at 9.03%. Against the backdrop of more moderate inflation, a recent upgrade by S&P Global Ratings, the stabilisation of the country's politics and electricity supply, and a more positive growth outlook, the real yield currently on offer (almost 6%) is attractive for local and foreign buyers, despite the country's volatile exchange rate.

SA's risk premium has narrowed by more than 220 bp in less than a year. A sustainable drop in our long bond yield from +10% to 9% or lower is a welcome fillip to our country's finances. SA could lower this even more by improving governance and closing the inflation differential to 1%. This would boost local bond prices and lower our budget deficit, our debt trajectory and our cost of capital.

## General Information

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

## Total Expense Ratio (TER)

The Fund's **Total Expense Ratio (TER)** reflects the percentage of the average **Net Asset Value (NAV)** of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

## Transaction Costs (TC)

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

## Total Investment Charge (TIC)

The sum of the TER and TC. The accurate figures will be available a year after the fund's inception date.

## Glossary Summary

**Performance:** Performance has been calculated using NAV to NAV with income reinvested.

**Conservative:** These portfolios typically have no or low equity exposure, resulting in higher interest yields and stable capital values with the probability of capital losses over the shorter term (3 months) highly unlikely.

## Fund Specific Risk

**Default Risk:** The risk that the issuers of fixed income instruments may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

**Derivatives Risk:** The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

**Interest Rate Risk:** The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

**Derivative counterparty risk:** A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.

**Liquidity risk:** If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

## Policy Objectives

The Fund adhered to its investment policy objectives as stated in the Supplemental Deed.

## Contact Details

**Management Company:** Prescient Management Company (RF) (Pty) Ltd, Registration number: 2002/022560/07 Physical address: Prescient House, Westlake Business Park, Otto Close, Westlake, 7945 Postal address: PO Box 31142, Tokai, 7966.
