

**FUND OBJECTIVE & STRATEGY**

The ClucasGray Equity Prescient Fund is a SA only, general equity fund. The Fund aims to provide long term capital growth ahead of its benchmark (FTSE/JSE Capped All Share Index) and the competing unit trust category by investing in any shares that are listed on the JSE. The Fund is a high conviction fund aiming to hold no more than 25 stocks at any one time. Fundamental analysis, a valuation discipline and a belief that inefficient markets create opportunities in mispriced assets underpin our process.

**FUND INFORMATION**

Portfolio Managers:	Andrew Vintcent & Grant Morris
Inception Date:	01 October 2011
Fund Size:	R1979 million
Unit Price:	379.97 cents
ASISA Category:	Equity SA General
Benchmark:	FTSE/JSE Capped All Share Index (J303)
Min Lump Sum:	R10 000
Min Monthly Investment:	R1 000
Issue Date:	05 February 2026
ISIN:	ZAE000160693

**The benchmark changed from Swix TR to FTSE/JSE Capped All Share Index (J303) effective 1 January 2026.**

**WHO SHOULD INVEST**

The Fund is suitable for long-term investors seeking high levels of investment growth who can tolerate the associated levels of capital volatility.

**RISK INDICATOR**

Generally, these portfolios hold more equity exposure than any other risk profiled portfolio therefore tend to carry higher volatility. Expected potential long-term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

**QUARTERLY COMMENTARY | DECEMBER 2025**

The final quarter of 2025 proved a good one for investors – the ClucasGray Equity Prescient Fund gained 11.3% in the quarter, outperforming both the benchmark, Swix, and the peers, which both gained less than 9%. For the year, the fund gained 29.9% – the 2nd best calendar year return since the fund was launched in October 2011. Only the 42% returned in the 2021 post Covid recovery has surpassed 2025.

Notwithstanding the strong nominal returns for the year, the fund lagged the Swix benchmark, which gained 42.4% in the year. The exceptional performance of, amongst others, the Gold and Platinum Indices drove the Swix returns. Whilst the fund had some exposure to Platinum, our lack of direct exposure to the Gold Miners had a material impact on relative returns.

As an aside, to illustrate the extent to which active managers struggled in 2025, the Satrix Capped All Share Index Fund, a passive investment vehicle, has delivered top quartile performance in the Morningstar South African Equity SA General category over the last 1 and 3 years.

Given the divergent performance of companies across the market, we were fairly active in the last quarter. We took the opportunity to reduce or remove those companies where we felt the prospective returns had moderated, and recycle that capital into others we felt have been left behind. The most notable changes included selling out of Metrofile, which has been delisted at a pleasant premium, and British American Tobacco. The latter has been a core holding in the portfolio for a sustained period of time – a low growth, cash generative business, for years it traded at a particularly undemanding valuation, rewarding shareholders via its elevated Dividend Yield. Following a period of very strong performance (it gained over 50% last year, notwithstanding the stronger Rand), we believe the valuation argument to be less compelling. In addition to the above sales, following a period of very strong returns, we trimmed our holdings in FirstRand, Absa, Astral and MTN.

We introduced 3 new holdings in the quarter, namely Anheuser, Nedbank and Truworths. We also added to a number existing holdings, the most notable being Reinet, Foschini, Glencore, AECL, Reunert, Sasol and Pick 'n Pay.

Whilst South African equities have performed very well, the performance has not been broad based. A number of key sectors and large companies have driven the bulk of the returns. We have been exposed to some, and not to others – that is the nature of active management at times. There are many companies which have not participated in the market rally, and hence we still see significant areas of the market that continue to look appealing. With an improving economic backdrop leading to decent earnings growth, elevated dividend yields and modest starting valuations, we believe the portfolio is well placed to continue to deliver on our long term return objectives.

The Fund has adhered to its policy objective.

The current asset allocation versus the previous quarter is as follows:

Fund Sector Allocation	Q4 2025	Q3 2025
Basic Materials	26%	26%
Industrials	18%	21%
Consumer Goods	20%	18%
Financials	34%	33%
Cash	2%	2%

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. A list of fund specific risks is provided below. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Max Gain: Largest increase in any single month.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

% Positive Months: The percentage of months since inception where the Fund has delivered positive returns.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

Dividend Yield: The weighted average dividend yield of all of the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
