INVESTMENT OBJECTIVE

The Fund will aim to deliver capital preservation and maximize income returns without placing undue risk on the capital of the investor.

INVESTMENT STRATEGY

The objective of this portfolio is to get broad exposure to global bonds. It makes use of a strategic asset allocation methodology and an indexed investment style. Typically, exchange traded funds (ETFs) are used.

GENERAL INFORMATION

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. A Fund of Funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios.

TOTAL EXPENSE RATIO (TER)

The Fund's **Total Expense Ratio (TER)** reflects the percentage of the average **Net Asset Value (NAV)** of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

TRANSACTION COSTS (TC)

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

TOTAL INVESTMENT CHARGE

The sum of the TER and TC is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and TC should not be deducted again from published returns.

Total Investment Charge* (incl VAT) annualised for the period since inception to 31/12/2025.

Management Fee	0.57%
Performance Fee	0.00%
Other Costs	0.16%
Total Expense Ratio (TER)	0.73%
Transaction Costs (TC)	0.00%
Total Investment Charge (TIC)	0.73%

GLOSSARY SUMMARY

Performance: Performance has been calculated using NAV to NAV with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividends withholding tax. Full performance calculations are available from the Manager on request.

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Moderate: Generally, these portfolios hold more equity and offshore exposure than lower risk portfolios / less than higher risk portfolios and therefore tend to exhibit higher / lower variability in returns (volatility). While expected returns could be higher than lower risk portfolios, the potential loss of capital could also be higher.

*Class A1

Issued: 20 April 2026

FUND SPECIFIC RISKS

Foreign investment risk: Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality, the greater the risk of default and therefore investment loss.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

POLICY OBJECTIVES

The Fund adhered to its investment policy objectives as stated in the Supplemental Deed.
