PERFORMANCE Illustrative Performance

RISK REWARD PROFILE (SRI)

The summary risk indicator (SRI) is a guide to the level of risk of this product compared to others. It shows how likely it is that the product will lose money because of movements in the markets. The indicator is based on a scale of 1 (lower risk, typically lower reward) to 7 (higher risk, typically higher reward). The lowest category does not mean risk free. The risk category of the Fund is not guaranteed and may change over time. Historical data and the methodology used may not fully reflect all potential future risks. The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you might get back less. For more information on the risks associated with this Fund, please consult the "Risk Factors" section of the Fund's Prospectus.

STRATEGY

The information displayed above reflects the underlying holdings of the Fund. Investors will acquire shares in the Fund. The goal of the Pzena Global Value Fund is to achieve long term alpha generation. Pzena actively manages the Fund and to this end, Pzena employs a classic value investment philosophy, seeking to own good businesses at low prices. The investment team at Pzena focuses on companies that are underperforming their historically demonstrated earnings power. Intensive fundamental research is applied to these companies in an effort to determine whether the problems that caused the earnings shortfall are temporary or permanent. After the research process is complete and the company meets all the investment criteria, the Fund's portfolio managers may agree to add the name to the portfolio; their decision must be unanimous. Our sell discipline is guided by the same ranking system that informs stock purchases. We continuously monitor every position's valuation rank (based upon the company's current stock price relative to normalized earnings) within its investment universe. Generally we sell a stock once it reaches the midpoint of its investment universe; however, we may hold a security below this point in order to maintain a desired level of diversification.

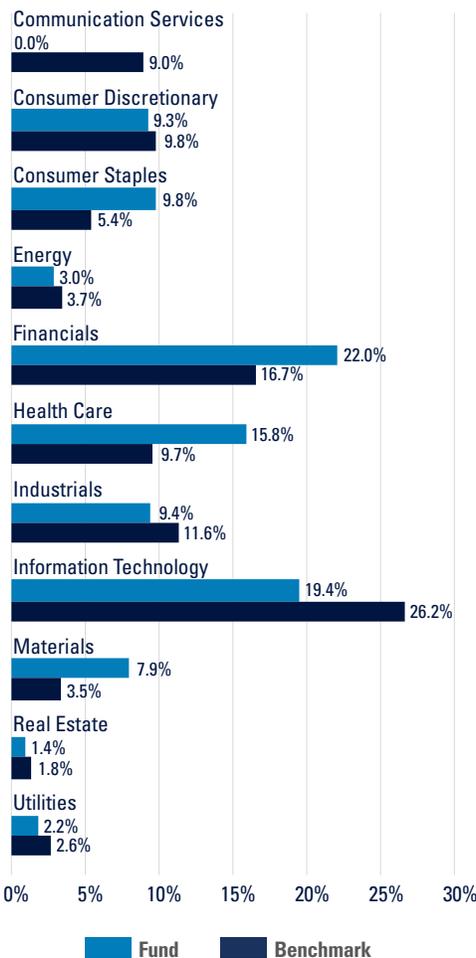

ABOUT PZENA

Pzena Investment Management, LLC, a New York-based, independent, registered investment manager, began managing assets in 1996.

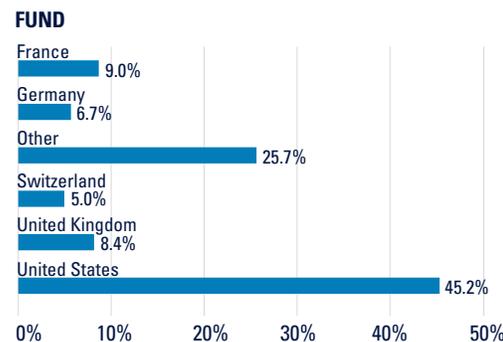

From the beginning we have followed a classic value investment style built on a foundation of intensive fundamental research and a disciplined, repeatable investment process.

Pzena manages U.S. and global equities for a substantial and diversified client base that includes pension plans, endowments, foundations, financial intermediaries and high-net-worth individuals.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Northern Trust International Fund Administration Services (Ireland) Limited by or before 09h30 (Irish Time), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time Northern Trust International Fund Administration Services (Ireland) Limited shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at 15h00 (Irish time).

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

For any additional information such as fund prices, brochures and application forms please go to www.pzena.com.

Glossary Summary

Active share: Measures the fraction of a portfolio (based on position weights) that differs from the benchmark index.

Annualised performance: Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Price /Earnings Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.
