Distributions	Accumulation Class

/ Portfolio description

The primary objective of the portfolio is to achieve long term capital appreciation by investing in a concentrated portfolio of global equities. The portfolio manager acquires global equities at levels below the assessment of the companies' fair values. The portfolio manager also takes cognisance of global economic, sector and investment trends to tilt the portfolio towards attractive regions, sectors, and companies. The Integrity Global Equity Fund is required to invest a minimum of 80% of the portfolio in equities and is therefore suitable for investors with an investment horizon of five years or longer.

Integrity diligently follows a **value investment philosophy and process**. This is the same investment philosophy and process applied in managing the Integrity Global Equity Strategy, with track record since 11 September 2012.

The portfolio has adhered to its policy objective since its inception.

/ 5-Year performance (Net of fees) *

*The illustrative investment performance which is shown is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

Integrity Global Equity Fund

September 2025

Minimum Disclosure Document & General Investor Report

/ Sector allocation

/ Regional allocation

/ Relative performance

During the quarter, equity markets continued to rally amidst the heightened volatility experienced at the beginning of April stemming from the US's tariff hike announcements. Global equity markets were materially impacted by the positive investor sentiment with an increasing preference for specific growth shares over value shares. Despite this backdrop, the Fund achieved a return of 10.08% ahead of the benchmark return of 7.62%. Considering the holdings, the Fund was negatively impacted by not having any exposure to the so-called FANGMANs (Facebook, Amazon, Netflix, Google, Microsoft, Apple, and NVIDIA) which detracted 2.69% of alpha over the period. On the other hand, the Fund benefitted from its top performing holdings during the quarter, namely; Samsung Electronics, Baidu, Intel, Barrick Mining and AngloGold Ashanti. The MSCI ACWI Value Index had a total return of 6.13% over the quarter compared to the return for the MSCI ACWI Growth Index of 8.98%. Given the remaining overvaluation of growth counters, the relatively elevated global bond yield environment and the uncertainty regarding global economic activity, the Investment Manager believes that this backdrop should be supportive of value over growth for the patient investor.

/ Fund composition

The Investment Manager made several portfolio changes during the quarter, specifically pertaining to counters in the materials and consumer discretionary sectors. These changes resulted in a decrease in the Fund's equity exposure. The Investment Manager was active in decreasing exposure to Vodafone, Samsung Electronics, AngloGold Ashanti, Barrick Mining, CK Hutchison, Intel, Paramount Skydance, Reckitt Benckiser, Baidu, CVS Health, Dollar General, and the iShares Edge MSCI World Value Factor ETF over the period. The Fund exited exposure to Alibaba Group Holding and Impala Platinum Holdings which performed well for the Fund. Exposure was initiated to LVMH Moët Hennessy Louis Vuitton SE and Sanofi SA which the Investment Manager believes offer upside potential at current levels. Additionally, the Investment Manager increased exposure to Berkshire Hathaway, Anheuser-Busch InBev, Fresenius Medical Care, Merck & Co, and B&M European Value Retail. Lastly, the derivative option strategies on Impala Platinum Holdings and Mercedes-Benz Group have expired.

Asset Allocation (gross)	2025/09/30	2025/06/30
Cash and derivatives	16.90%	13.22%
Equities	83.10%	86.78%
Total	100.00%	100.00%

/ Glossary

Annualised performance: Annualised performance shows longer-term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The Net Asset Value represents the assets of a Fund less its liabilities.

/ Risks

Developing Market risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

/ Disclaimer

The Integrity Global Equity Fund is a sub fund of the Prescient Global Funds ICAV, an open-ended umbrella type investment company, with segregated liability between its sub funds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Communities (UCITS) Regulation, 2011 as amended (the Regulations). It is managed by Prescient Fund Services (Ireland) Limited at 35 Merrion Square East, Dublin 2, D02 KH30, Ireland which is authorised by the Central Bank of Ireland, as a UCITS IV Management Company. The Prescient Global Funds ICAV full prospectus and the Fund's KIID are available free of charge from the Manager or by visiting www.prescient.ie. The Manager retains full legal responsibility for any third party named portfolio. The Integrity Global Equity Fund is registered and approved under section 65 of CISA.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period, TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets.

Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Fund Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient Fund Services (Ireland) Limited before 10h00 (Irish time), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time, Prescient Fund Services (Ireland) Limited shall not be obliged to transact at the net asset value price as agreed to. The Funds are priced at 17h00 (New York Time). Prices are published daily and are available on the Prescient website.
