

FUND OBJECTIVE

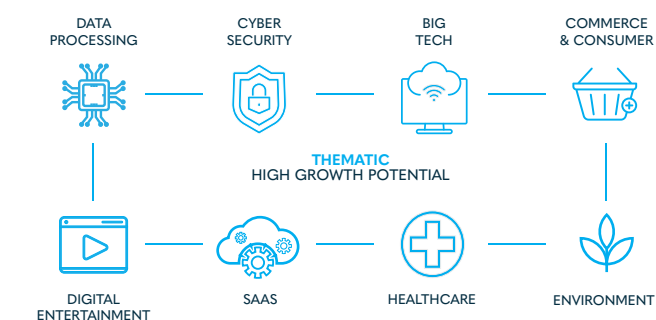

The Fund aims to provide long-term capital growth using a global top-down thematic approach. Investments are identified based on their ability to advance technological innovation and change consumer behaviour. It targets an annual return* of US Consumer Price Inflation plus 7% over any rolling five-year period.

INVESTOR SUITABILITY

The Fund is suitable for retail and institutional investors seeking higher long-term returns while being able to endure periods of elevated volatility. It is not suitable for investors seeking capital preservation or those with a short timeframe. An investment horizon of 5+ years is recommended.

QUARTERLY COMMENTARY AS AT 31 MARCH 2026

The first quarter of 2026 marked a sharp pivot in market dynamics, as geopolitical risk abruptly displaced the constructive momentum that characterised the end of last year. After entering the year on firm footing, a significant escalation in the U.S.-Iran conflict in March became the dominant driver of asset prices. The resulting surge in energy prices, with Brent crude recording its largest monthly gain since the 1970s, reignited near-term inflation concerns and pushed Treasury yields materially higher. This rapid tightening in financial conditions triggered a broad, correlated selloff across risk assets. Unlike prior periods of volatility that were largely contained within specific styles or sectors, March was notable for its scope and speed. Growth and value declined in tandem, diversification offered limited protection, and the dominant market impulse shifted decisively toward de-risking.

In this environment the Wealth Warriors Fund returned -11.9% for the quarter, underperforming the benchmark (Morningstar EAA Fund Global Large-Cap Growth Equity category) which returned -8.0%. Weakness was broad-based across the portfolio and only four of the Fund's 27 holdings (ASML, MP Materials, Netflix, and TSMC) finishing the quarter in positive territory. While this period has understandably been uncomfortable, we believe the drawdown is best understood as a macro- and sentiment-driven repricing rather than a reflection of deteriorating company fundamentals. The Fund's positioning in high-growth, long-duration assets, particularly across AI infrastructure and technology, naturally leaves it more sensitive to rising real yields and shifts in risk appetite, and this has been the primary driver of recent performance.

Looking through the share price volatility, the underlying operating performance of our holdings remains highly encouraging. 92% of holdings beat consensus revenue expectations and 72% exceeded EPS estimates. The average revenue surprise was +2.09%, while the average EPS surprise was +717%. Looking forwards, it was also notable that 76% of companies that provided forward guidance did so above market expectations. At a time when market pricing implies growing scepticism around AI infrastructure demand and broader growth durability, company results continue to point in the opposite direction, with resilient demand, strong execution, and, in many cases, improving forward outlooks across the portfolio.

This growing disconnect between sentiment and fundamentals is evident across several of our core holdings. NVIDIA continues to demonstrate the durability of AI infrastructure demand, delivering strong results and forward guidance that reaffirm the scale and persistence of the global compute buildout.

Salesforce provided one of the quarter's most notable earnings surprises, reinforcing our view that AI is expanding rather than compressing the addressable market for enterprise software platforms. Palo Alto Networks continues to benefit from a structurally strengthening cybersecurity landscape, as geopolitical and digital threats drive sustained demand for best-in-class security solutions, while MP Materials remains strategically important in the context of rising geopolitical tensions, with its earnings profile highlighting the operational leverage embedded in its business as rare earth supply chains become increasingly critical.

Importantly, the recent pullback has materially improved forward return expectations. Our internal valuation framework, HighWay, now indicates double-digit annualised return potential across the majority of holdings, with a 5-year expected portfolio return of 14.8% per annum from current levels. Sell-side consensus is similarly constructive, implying approximately 35% upside over the next 12 months across Fund holdings. While we do not rely on external forecasts in isolation, the alignment between internal and external expectations reinforces our view that current market pricing reflects an overly cautious near-term outlook rather than a realistic assessment of long-term earnings power.

Looking ahead, the macro backdrop has become more complex. Elevated energy prices, tighter financial conditions, and heightened geopolitical uncertainty have widened the range of potential outcomes for inflation, monetary policy, and risk appetite, and markets are likely to remain sensitive to incoming headlines, particularly if oil prices remain elevated or real yields continue to rise. We also recognise that in this type of environment, even strong earnings results may take time to be reflected in share prices. That said, the fundamental footing of the portfolio remains strong, with the key measures we prioritise (revenue growth, margin durability, return on invested capital, and balance sheet strength) continuing to support our conviction in the businesses we own.

In our view, periods such as these often create the most compelling opportunities to deploy capital into high-quality, long-duration growth companies at more attractive valuations, provided the underlying investment thesis remains intact. We remain focused on backing companies with durable competitive advantages, exposure to structural growth themes, and the ability to compound capital over the long term, while maintaining discipline on valuation and risk management. We thank our clients for their continued conviction in the Wealth Warriors mandate, and as always, our team remains available to engage on any questions you may have.

** 22/11/2017 – The Fund changed custodians from Saxo Bank to Northern Trust to convert to a UCITS structure. This transfer provided clients with a unitised product governed by European legislation. The same decision-making personnel stayed with the Fund following the transfer and the mandate remained the same as that adopted under the custodianship of Saxo Bank. For the purpose of presenting the performance returns, the UCITS structure started on 22nd November 2017, while the return for the pre-existing structure includes the full performance from the 31st December 2016 to the 21st November 2017. Performance of the Fund includes all fees and costs incurred. Whilst under the custodianship of Saxo Bank (31/12/2016 to 21/11/2017) the management fee was 1%, while the UCITS structure operates on a fixed TER (Total Expense Ratio) of 1.60%. Fund performance includes all fees and costs incurred. Benchmark performance is shown without any fees. Benchmark performance includes dividends, assumed to be reinvested. Past performance is not indicative of future performance. The Fund has adhered to its policy objective.

From 02 February 2026, the MSCI ACWI Net Total Return Index was replaced by the Morningstar EAA Fund Global Large-Cap Growth Equity category as the performance comparator shown in the illustrative performance chart. The Morningstar EAA Fund Global Large-Cap Growth Equity category has been determined to be the most appropriate and representative benchmark for the Fund's investment policy. ©2026 Morningstar. On 31/12/2025 the Fund won the Profile Unit Trust Award for 3-year performance to 31 December 2025. The full details and basis of the award are available from the manager.

REGULATORY STATEMENT

The High Street Wealth Warriors Fund is registered and approved under section 65 of CISCA. High Street Wealth Warriors is a sub-fund of the Prescient Global Funds ICAV, an open-ended umbrella type investment company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Community (UCITS) Regulation, 2011 as amended (the Regulations). It is managed by Prescient Fund Services (Ireland) Limited which is authorised by the Central Bank of Ireland as a UCITS IV Management Company. The Prescient Global Funds ICAV full prospectus and the Fund's KIID are available free of charge from the Manager or by visiting www.prescient.ie. Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient Fund Services (Ireland) by or before 10h00 (Irish Time), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at 17h00 (New York Time). Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request. For any additional information such as Fund prices, brochures and application forms please go to www.hsam.co.za. Annualised performance shows longer term performance re-calculated to a 1-year period, which shows the average return per year over the period. Actual annual figures are available to the investor on request.

High Street Asset Management (Pty) Ltd, registration number 2013/124971/07, is a Financial Services Provider (FSP 45210) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), is authorized to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision.

The highest and lowest returns for any 1 year over the period since inception have been shown. The net asset value represents the assets of a Fund less its liabilities.

WHY IS THIS FUND IN CATEGORY 6?

The Fund is rated as 6 due to exposure to high-growth shares and stocks, and the nature of its investments. The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested. The Fund may invest in securities which may be difficult or impossible to sell at the time and the price that the seller would like which could have a negative effect on the Fund's management or performance. It may be difficult for the Fund in extreme market conditions to redeem its shares from a CIS or ETF at short notice without suffering a loss. Investing in a CIS or ETF may lead to payment by the Fund of additional fees and expenses in relation to the CIS or ETF. The Fund may use FDIs for efficient portfolio management and hedging purposes. It may be that the use of FDIs causes losses to the Fund. As the investments of the Fund are in various currencies and the Fund is denominated in US Dollars your shares may be subject to currency risk.

WHAT DO THESE NUMBERS MEAN?

They rate how a fund might behave and how much risk there is to your capital. A Category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a Category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1). A Category 6 fund is labelled aggressive, as it may result in significant periods of capital volatility. However, due to the nature of growth equities expected long-term returns are higher than other categories.

MORE ABOUT THIS RATING

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund. For a more detailed explanation of risks, please refer to the "Risk Factors" sections of the Prospectus and the Fund Supplement.
