

Prescient OMBA Global Equity Feeder Fund

Administered under the Prescient Unit Trust Scheme

4Q 2025 Minimum Disclosure Document and General Investor Report

INVESTMENT OBJECTIVE

The investment objective of the Feeder Fund is to achieve capital appreciation over the long term. The Feeder Fund aims to achieve this investment objective through obtaining exposure to the Underlying Fund (Omba Global Equity Fund, sub-fund of the Omba Investments ICAV), a DIVERSIFIED portfolio consisting primarily of GLOBAL equities and equity-related securities.

The Underlying Fund is permitted to invest in listed and unlisted financial instruments in line with the Undertaking for Collective Investment in Transferable Securities (UCITS) regulations and Underlying Fund supplemental documents determined by legislation or amendment thereof from time to time.

MARKET COMMENTARY

2025 closed on a positive note for global equities (MSCI ACWI, +1.1% MoM, +22.9% YTD). The Fed cut rates again to 3.5%–3.75% but long maturity yields have barely moved. The yield curve has steepened as investors expect higher long-term inflation and growth. US Q3 2025 GDP growth came a full percentage point higher than expectations at 4.3% (QoQ annualised), despite public sector job cuts and the longest government shutdown in history. Inflation remains above target (US CPI November 2025, +2.7% YoY) and the labour market looks weaker (Unemployment Rate November 2025, 4.6%) but not broken. US large-caps (S&P 500, +0.1% MoM, +17.9% YTD) reacted well to the macro data but finished the month below MSCI ACWI. Performance was broad. The S&P 500 Equal Weight (+0.5% MoM) overtook its market capitalization weighted sibling while Nasdaq 100 and small-caps were in line/worse than large-caps. Over in “boring” Europe, broad mainland (Stoxx 600, +2.8% MoM, +20.6% YTD) and UK equities (FTSE 100, +2.3% MoM, +25.8% YTD) outperformed while the US Dollar weakened against the Euro (EURUSD, +1.2% MoM) and British Pound (GBPUSD, +1.5% MoM). The Japanese yen (USDJPY, 0.3% MoM) struggled even though the BoJ raised its policy rate to 0.75%, a 30-year high. Japanese equities (Nikkei 225, +0.3% MoM, +28.7% YTD) lacked direction as the market digests the government’s fiscal intentions and the effects of tariffs. Emerging markets (MSCI EMS, +3.0% MoM) were a mixed basket but outperformed driven by South Korea (Kospi, +7.3% MoM, +75.6% YTD) and Mexico (iShares MSCI Mexico Capped UCITS ETF, +4.2% MoM, +57.3% YTD) which had a fantastic year. Chinese equities pulled in both directions. Onshore (CSI 300, +2.5% MoM, +21.0% YTD) gained while offshore equities (Hang Seng, –0.6% MoM, +32.5% YTD) finished lower, both logging significant gains for the year. In December, we closed our US real estate position. The yield curve is steepening and the fiscal and economic trajectory in the US means that even if long maturity yields do not rise, they could struggle to fall, further delaying relief for the sector. We used the proceeds to buy into India (Nifty 50, –0.3% MoM, +11.9% YTD) which has struggled this year. We see an improved value proposition when one adjusts for growth. Low inflation and falling rates could boost equities while a trade deal with the US could reduce uncertainty. We remain cautiously positioned for 2026.

GLOSSARY OF TERMS

Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
Dividend Yield	The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.
Best/Worst 12 Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.

FUND SPECIFIC RISKS

Equity Investment Risk: Value of equities (e.g., shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g., bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Currency Risk: The change in price of one currency in relation to another. This is common where you invest using multiple currencies, either intentionally or not (i.e., underlying holdings of a UCITS would be un-intentional).

CONTACT DETAILS

Management Company & Investment Manager: Prescient Management Company (RF) (PTY) Limited, **Registration Number:** 2002/022560/07, **Physical Address:** Prescient House, Westlake Business Park, Otto Close, Westlake, 7945. **Postal Address:** PO Box 31142, Tokai, 7966. **Telephone:** 0800 111 899. **Email address:** info@prescient.co.za **Website:** www.prescient.co.za

Trustee/Custodian: Nedbank Limited **Registration Number:** 1951/000009/06 **Physical address:** Nedbank Sandton, 135 Rivonia Road, Sandown, Sandton, 2196, South Africa. **Telephone number:** +27 860 555 111 **Website:** www.nedbank.co.za.

The Management Company and Trustee are registered and approved under the Collective Investment Schemes Control Act (No.545 of 2022). They are members of the Association for Savings and Investment South Africa. This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Scheme Control Act.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Feeder Fund is a portfolio that invests in a single portfolio of a Collective Investment Scheme which levies its own charges and could result in a higher fee structure for the Feeder Fund.

The Feeder Fund's Total Expense Ratio ("TER") will be provided one year from inception. It reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolios. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the fund incurred as costs relating to the buying and selling of the funds underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. These amounts may change without any notice although within the confines of the Feeder Fund Supplement.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption, and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request
