

WHAT IS THE FUND'S OBJECTIVE?

The fund aims to achieve a higher return than a US dollar term bank deposit. It is mainly focused on delivering short-term income.

WHAT DOES THE FUND INVEST IN?

The fund invests between 75% and 100% of its assets in a wide variety of fixed income assets. This may include bonds, money market instruments and other debt securities issued by international governments, banks and other companies or institutions.

Up to 25% of the fund may be invested in listed property, preference shares and other forms of hybrid debt or equity instruments.

While the fund may invest in instruments in any currency, its effective exposure to the US dollar will at least be 75% at all times.

The average duration in the fund will typically not exceed three years.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Risk Profile

Maximum growth/ minimum income exposures

The fund is tactically managed to secure an attractive income, while protecting capital.

Its investments are carefully researched by a large and experienced investment team and subjected to a strict risk management process. The fund is actively positioned to balance long-term strategic positions with shorter-term tactical opportunities to achieve the best possible income.

While the fund is managed in a conservative and defensive manner, it is not guaranteed to always outperform cash over short periods of time, and may suffer capital losses primarily as a result of interest rate movements or negative credit events.

Capital growth, if any, will generally come from capital market changes such as falling interest rates or movements in foreign currencies.

This feeder fund aims to remain fully invested in units in the offshore domiciled Global Strategic USD Income Fund. The only other assets that will be held at feeder fund level are local and foreign cash holdings for liquidity purposes.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The recommended investment term is 12-months and longer. Given its limited exposure to growth assets, the fund is not suited for long investment terms.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Conservative investors who are looking for an intelligent alternative to US dollar bank deposits.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.50% is payable.

The full annual fee is collected in the master fund. Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs.

We do not charge any fees to access or withdraw from the fund.

INCOME DISTRIBUTIONS

Not available - New fund

*TER's not yet available. Please refer to page 3 for more information.

Please refer to page 3 of the Comprehensive Fact Sheet for important additional information, including change in cost disclosures.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL STRATEGIC USD INCOME PRESCIENT FEEDER AMETF

Collective investment schemes (CISs) should be considered as medium- to long-term investments. The value of units may go down as well as up, and therefore Prescient does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The yield shown is an estimate (gross of fees) in part based on market assumptions and forecasts. The yield is calculated by taking the interest and income receivable of all the instruments in the fund divided by the net asset value, expressed as a nominal annual rate. It is provided to give an approximate indication of the achievable yield for an investment made at the reporting date. Actual experience may differ, based on changes in market values, interest rates and changes in costs actually experienced during the investment period. The yield disclosed on the MDD is current and calculated as at the MDD reporting date. A feeder fund invests in a single fund of a collective investment scheme, which levies its own charges and could result in a higher fee structure for the feeder fund. The asset allocation by instrument type are reflected on a look-through basis. The asset allocation by issuer type and top issuer exposures are not reflected on a look-through basis. The Management Company and Trustee are registered and approved under the Collective Investment Schemes Control Act (No.45 of 2002). Prescient is a member of the Association for Savings and Investments South Africa. The Management Company reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. The Manager retains full legal responsibility for any third party-named portfolio. CISs are allowed to engage in scrip lending and borrowing. Standard Bank has been appointed as trustees for the fund. Prescient is a full member of the Association for Savings & Investment SA (ASISA). Exchange Traded Funds vs Unit Trusts: Whilst both unit trusts and ETFs are regulated and registered under the Collective Investment Schemes Control Act, ETFs trade on stock exchanges just like any other listed, tradable security. Unlike a unit trust, which can be bought or sold only at the end of the trading day, an ETF can be traded intraday, during exchange trading hours. Exchange traded funds are listed on an exchange and may incur additional costs. This portfolio operates as a white label fund under the Prescient ETF Scheme, which is governed by the Collective Investment Schemes Control Act.

Management Company: Prescient Management Company (RF) (Pty) Ltd **Registration number:** 2002/022560/07 **Physical address:** Prescient House, Westlake Business Park, Otto Close, Westlake, 7945 **Postal address:** PO Box 31142, Tokai, 7966. **Telephone number:** 0800 111 899 **E-mail address:** info@prescient.co.za **Website:** www.prescient.co.za.

Trustee: Standard Bank of South Africa Ltd **Registration number:** 1962/000738/06 **Physical address:** Standard Bank Centre, 5 Simmonds Street, Johannesburg, South Africa 2001 **Telephone number:** 0860 222 050 **Website:** www.standardbank.co.za

HOW ARE UNITS PRICED AND AT WHICH PRICE WILL MY TRANSACTION BE EXECUTED?

CISs are traded at ruling prices set on every trading day. Fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close) and forward pricing is used. Instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. The payment of withdrawals may be delayed in extraordinary circumstances, when the manager with the consent of the fund trustees deem this to be in the interest of all fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the fund. When the suspension of trading relates to only certain assets held by the fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued, but will delay liquidity on the affected portion of the fund. If the fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force Coronation to sell the underlying investments in a manner that may have a negative impact on remaining investors of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

As this is a new fund the fact sheet does not include performance information yet. Once performance information is available the following will apply: Performance is calculated by using net NAV to NAV numbers with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period and are available to investors on request. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

HOW ARE THE BENCHMARK RETURNS CALCULATED?

The benchmark used for performance purposes is the Secured Overnight Financing Rate (SOFR).

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

The TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available. TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1-year TER is for the 12 months to end of the previous financial year (updated annually). The 3-year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September). Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information, please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on the manager's website: www.prescient.co.za.
