

BAYMONT Global Equity Fund

FUND MANAGERS

Vanessa Hofmeyr and Ulf Brinkmann

FUND OBJECTIVE AND PHILOSOPHY

The investment objective of the Baymont Global Equity Fund is to achieve long-term capital growth by investing across global equity markets. The investment philosophy is to invest in dominant, high-quality businesses which have a history of developing both growth and real economic value. The fund has adhered to its policy objective.

FUND MANAGER COMMENTARY

Earlier in the year, investor concerns of the aggressive artificial intelligence (AI) capital investment plans by the tech-heavy industry were soon overshadowed by geopolitical events in the Middle East. In March 2026, global equities recorded their worst month in over three years as US and Israeli military strikes on Iran unsettled investors. Iranian military responded to the strikes by refusing passage for vessels through the world's most significant energy transit route, the Strait of Hormuz. Spiking energy prices raised inflation fears, and the previous narrative of the pending interest rate cuts was abandoned. The MSCI All Country Index was down 7.3% for March and down 3.5% for the quarter. Emerging markets, taking a harsher fall of 13% in March, ending flat for the quarter.

Geopolitical uncertainty remains the key focus for investors. For now, earnings growth expectations have stayed relatively steady with the consensus for a de-escalation of the conflict in the near term. That said the global growth and inflation outlook is uncertain. The longer it takes to reach a resolution the outlook deteriorates. Volatility will remain high for now.

The key contributors to the performance of the fund in the first quarter included Samsung, Exxon Mobile, Chevron, Johnson & Johnson and ASML Holdings. The key detractors included Microsoft, Tesla, Waters, United Health and Oracle.

Some changes were made to the fund, based on pricing, diversification from both a sector and a geographical position as well as risk characteristics. We added Genmab, Insmad, Mitsubishi and RTX. To fund these purchases, we sold Interactive Brokers, Nebius and Rolls Royce.

We will stay focused on attractively priced companies with a robust competitive advantage, strong balance sheets and low sensitivity to economic cyclicality. We remain patient investors and assess the opportunities as they present themselves.

The BACCI Global Equity Fund's name changed to BAYMONT Global Equity Fund effective 28 July 2023.

Please note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.

ILLUSTRATIVE PERFORMANCE

The investment performance is for illustrative purposes only. The investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date.

Growth of \$100 000 investment net of all fees and expenses

RISK PROFILE

A high-risk profile is associated with this fund as the objective is to be generally highly exposed to equities, which is a more volatile asset class.

TOP 10 HOLDINGS

SECTOR ALLOCATION

ASSET ALLOCATION

FUND RISK

Derivative Risk: Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.

Volatility Risk: Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.

Concentration and Sector Risk: A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will materially impact the returns of the portfolio more so than diversified portfolios.

Equity Risk: Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Currency/Exchange Rate Risk: Assets of a fund may be denominated in a currency other than the Base Currency of the fund and changes in the exchange rate between the Base Currency and the currency of the asset may lead to a depreciation of the value of the fund's assets as expressed in the Base Currency.

Foreign Investment Risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax settlement risk and currency fluctuations.

PORTFOLIO VALUATION & TRANSACTION CUT-OFF

The fund is valued daily at 17:00 New York Time. The transaction cut-off time is 14:00 on a business day. Instruction received after 14:00 will be processed on the following business day.

GLOSSARY

Net Asset Value (NAV): means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

Annualised Performance show longer term performance rescaled to a one-year period. Annualised performance is the average return per one year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest Return: The highest and lowest rolling twelve-month performance of the portfolio since inception.

Total Expense Ratio (TER): reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Transaction Costs (TC): is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

Total Investment Charge (TIC) should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

Total Investment Charges (TIC%) = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

When foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of information. The investor acknowledges the inherent risk associated with the selected investment and that there are no guarantees.

The BAYMONT Global Equity Fund is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002
