

Crosby Street Global Large Cap Equity Fund

SELECT EQUITY

INCEPTION DATE | OCTOBER 2024

FEBRUARY 2026

The investment objective of Crosby Street Global Large Cap Equity Fund (the "Fund") is to pursue positive total returns. The Fund will seek to achieve its objective through investment principally in an actively managed portfolio of equities and equity-related securities (i.e., shares, including common and preferred stock, warrants, rights and/or equity swaps) of companies that are located throughout the world, both in developed and emerging markets. The Fund's investments will typically consist of holdings in companies with market capitalisations greater than \$12.5 billion at the time of initial investment. The Fund will have no sectoral or industry focus. The Fund is actively managed without reference to a benchmark. For investor communication purposes only, the Fund may measure its performance against the MSCI ACWI Index. There is no guarantee that an investment objective will be achieved or that a return on capital will be obtained. The Fund does not benefit from any guarantee to protect the capital.

Any performance data quoted represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance data quoted. Any Fund's returns are published net of fees for Class A shares and do not take account of any commissions and costs incurred on the issue and redemption of units. Any past performance is presented net of all fees, excluding the entry and exit fees. Dividend distributed for distribution classes. Returns for other share classes will differ from those shown above. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Currency exchange rates fluctuate and may impact returns experienced by an investor over time. The Fund is actively managed without reference to a benchmark.

THE SUMMARY RISK INDICATOR

Lower Risk ← Higher Risk
Typically Lower Rewards → Typically Higher Rewards

The summary risk indicator of the KIID allows for an assessment of the risk level of this product compared to others. It indicates the likelihood that this product may incur losses in the event of market movements. It assesses the potential future loss of returns at a moderately high level, and adverse market conditions are likely to impact you. The product is classified as a 6 out of 7, which is a medium-high risk class. The Fund is subject to high volatility, implying high/very high fluctuations of prices and, therefore, a higher risk of potential gains and losses. Risk category shown is not guaranteed and may shift over time.

Beware of the exchange rate risk. The amounts paid to you will be in another currency; therefore, your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator. The presented summary risk indicator is based on the USD share class; please note that the summary risk indicator and its risk class differs by share class.

Inherent risk of the Fund (non-exhaustive list):

Equity risk: The Fund may invest directly or indirectly in equity securities. The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions.

Risk of capital loss: This is not a guaranteed product. Investors may risk losing part or all of their initial investment.

Concentration Risk: The assets are expected to be concentrated in a portfolio of issuers and such concentration increases the risk of loss to the Fund if there is a decline in the market value of any security, industry, or sector in which the Fund has invested a large percentage of its assets. Investment in a concentrated fund may entail greater risks than in a less concentrated fund.

Volatility risk: The value of the shares may be affected by market volatility.

Liquidity risk: Certain types of securities may be difficult to buy or sell, particularly during adverse market conditions, which may affect their value.

Exchange rate risk: An investment in the shares may directly or indirectly involve exchange rate risk. When a Fund or a share class is denominated in another currency than the one of your country, or costs are partially or fully paid in another currency than yours, then costs and performance may increase or decrease as a result of currency and exchange rate fluctuations.

Currency hedging risk: A Fund may enter into currency exchange transactions and/or use derivatives (at the portfolio level or, in certain circumstances as described in the Prospectus, at a Class level) to seek to protect against fluctuations as a result of changes in currency exchange rates.

This is not an exhaustive list of the risks. Other risks apply. Before making any investment decision, please read the relevant articles of association, prospectus (in English), supplement and key investor information document (KIID) (available in English and in Spanish) and the latest annual/semi-annual report (as applicable), all of which are available and free of charge by clicking on <https://www.theamx.com/ucits/>.

TOTAL EXPENSE RATIO ("TER")

With regard to TER, a representative figure for the Fund is 1.11% (for the A share classes). A high TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Please note this TER is based on current asset levels of the Fund and it is subject to change as the Fund scales. The representative TER includes the current estimated value of Fund expenses, Management Company fees, Depository fees, and Administrator fees, as well as the value of the Investment Manager's Class A investment management fees. The TER for other classes will be higher if the Investment Manager's fee for such class is higher than the Investment Manager's Class A investment management fee.

¹Dividend and interest income for accumulating ("Acc") share classes will be reinvested in the Fund and will not be distributed to you.

²The on-going charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations. All charges will be paid out by the Fund.

³Maximum percentage of exit costs on your investment before it is paid out to you. The percentage of exit costs is based on the NAV.

⁴Percentage of the Investment Manager's fees on the value of your investment per year. Please note that additional costs and expenses will apply in respect to your investment in the Fund as well, such as the Management Company's fees, the Administrator's and Depository's fees and Fund expenses. Such additional costs and expenses are not listed in this table, but an estimate of such costs and expenses for Class A are included in the representative TER disclosed above. Such costs, fees and expenses may differ per share class and are subject to change. All Fund costs are detailed in the Prospectus and KIID, which are available online at the following link: <https://www.theamx.com/ucits/>.

TAXES

The future performance is subject to taxation, which depends on the personal situation of each investor and which may change in the future. Please liaise with your tax adviser to understand how your returns will be impacted by taxes.

IMPORTANT INFORMATION

This is a marketing communication. The information contained in this report is provided for informational purposes only and is not intended as an offer or solicitation of an offer for the purchase or sale of any security and should not be relied upon by you in evaluating the merits of investing in any securities. Before making any investment decision, investors must read the key information document, the prospectus and the supplement of the Crosby Street Global Large Cap Equity Fund (the "Fund") to consider all characteristics, objectives, risks and costs. Any investor investing in the Fund will acquire shares in the Fund only, and investors will not acquire any ownership interest in any of the underlying assets of the Fund.

The performance data herein represents past performance, which is not indicative of future results. Performance is expressed in US dollars. Unless otherwise stated, performance results reflect the performance earned by an investor who had invested at the beginning of each year in Class A shares, which has an annualized base management fee of 0.90% of net asset value, charged monthly in arrears. Performance is presented net of actual fees paid by investors in Class A. It is anticipated that fees could be higher for investors in other products in this strategy.

Performance is calculated monthly using the net asset value appreciation (net of all actual fees and expenses) as a percentage of beginning-of-month net asset value (appropriately adjusted for any capital activity). Purchases and sales of securities are recorded on a trade date basis. Realized gains and losses from security transactions are generally determined using the specific identification method. Unrealized gains and losses from investment transactions are recognized as income. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Annual returns are calculated by linking the monthly performance through compounded multiplication. Exposure to certain derivative instruments may not always be reflected in the data presented in this report (e.g., certain named securities may be owned via swap). The cumulative rate of return is calculated by linking the annual rates of return. Average annualized rates of return are equivalent to the annual rate of return which, if earned in each year of the indicated multi-year period, would produce the actual cumulative rate of return over the time period. Computations assume reinvestment of all dividends, interest and capital gains.

Performance returns shown may be compared to the MSCI ACWI (All Country World Index). The volatility of this index may be materially different from that of the Fund. In addition, the holdings of the Fund will generally differ significantly from the securities that make up the index. This index has not been selected to represent an appropriate benchmark to compare performance, but rather is disclosed to allow for comparison to a well-known and widely recognized index. Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality,

FOR CURRENT OR PROSPECTIVE INVESTORS IN THE UNITED KINGDOM

This document may only be distributed and the Shares may only be offered or placed in the United Kingdom to the extent that (1) the Fund is permitted to be marketed to professional investors in the United Kingdom in accordance with Alternative Investment Fund Managers Directive (Directive (2011/61/EU) (the "AIFMD") (as it forms part of the domestic law of the United Kingdom); or (2) this document may otherwise be lawfully distributed and the Shares may otherwise be lawfully offered or placed in the United Kingdom (including at the initiative of the investor).

FOR CURRENT OR PROSPECTIVE INVESTORS IN SOUTH AFRICA

In South Africa, Select Equity Group, L.P. operates under a formal exemption from the Financial Advisory and Intermediary Services Act, 2002, granted by the Financial Sector Conduct Authority.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Annualised performance shows longer term performance rescaled to a one-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. The highest and lowest returns for any one year over the period since inception have been shown. NAV is the net asset value represents the assets of a Fund less its liabilities.

The Fund is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002 (CISCA).

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information.
