Transaction cut-off time:	16:00

Notes

- Benchmark and performance data is provided by Cogence (Pty) Ltd.
- There have been no material changes to the fund details displayed above since the fund launch.

Investment policy

The objective of this fund is to generate high levels of capital growth and reasonable levels of income, while minimising capital volatility. This will be achieved by investing in collective investment schemes in accordance with the Act that have a bias to South African equities. The fund will be actively managed.

The fund has adhered to its policy objectives as stated in the supplemental deed.

Who this investment may be suitable for

The fund is suitable for investors seeking high capital growth potential over the longer term who are comfortable with short-term volatility and prepared to accept the risk of capital loss.

Historical Performance

Period	Fund	Benchmark
1 month	4.28%	3.97%
3 months	10.39%	9.62%
YTD	16.41%	15.89%
1 year	23.78%	25.41%
3 year	-	-
5 year	-	-
Since Launch (Ann.)	12.13%	13.44%
Since Launch (Cum.)	27.32%	30.48%

Performance data longer than 1 year is annualised.

Risk Statistics (Since launch)

Statistic	Fund	Benchmark
Volatility	13.43%	14.82%
Maximum drawdown	-10.55%	-10.32%
Highest one-year return	23.78%	25.41%
Lowest one-year return	-4.33%	-2.02%
Sharpe ratio (Rf = 0%)	0.88	0.88

Performance is calculated using the Total Returns Index (TRI), net of fees, with all dividend and/or income declarations reinvested on the declaration date at the net asset value price at that time. Investment performance is for illustrative purposes only.

March 2024	1.09c
September 2024	1.51c

Asset allocation chart

Portfolio composition

During the quarter the fund decreased the property allocation to align with the benchmark allocation.

Monthly market commentary

In Q3 2024, the South African equity market posted a solid 9.6% return, with Financials and Industrials leading the way, gaining 13.7% and 11.6%, respectively. On the economic front, fewer power outages, a stronger rand, and inflation easing to 4.4%, which prompted the SARB to cut interest rates. While there are still challenges in sectors like Energy and Telecoms, the overall outlook is positive, with local markets showing strong momentum.

Equity managers with a portfolio tilt toward SA Inc had another strong quarter compared to the benchmark. All Weather Equity, which maintained its tilt to SA Inc stocks after a strong Q2, was a top contributor to the portfolio, as the fund outperformed its benchmark by 1.11% for the quarter. Detractors in the portfolio over the quarter was Ninety One SA Equity fund which underperformed the benchmark by 73 bps. Among the largest detractors from relative performance was the Fund's position in Aspen Pharmicare holdings and Gold Fields which struggled over the quarter.

SA listed property saw a strong rally in the third quarter, with the FTSE/JSE All Property Index gaining 19.14%. This performance was fuelled by lower bond yields and better growth prospects due to declining interest rates. The Sesfikile BCI Property Fund outperformed its benchmark during the period, further benefiting from these favourable market conditions.

General

Collective investment schemes (Unit Trusts) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending (i.e. borrowing and lending of assets). The manager does not provide any guarantee, with respect to the capital or the return of a portfolio. Prescient retains full legal responsibility for the third-party-named portfolio. Any forecasts and/or commentary in this document are not guaranteed to occur. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. A schedule of all fees and charges, inclusive of VAT and maximum commissions, is available on request from us or from your financial adviser. Forward pricing is used.

Yields

The yield for bond and income portfolios is historic and is calculated quarterly.

Important information

The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The ability of the portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. A manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity, and the manager must keep the investors informed about these circumstances.

A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges. This could result in a higher fee structure.

Lump-sum performance returns are being quoted. Income distributions, prior to deduction of applicable taxes, are included in the performance calculations. NAV to NAV figures have been used for the performance calculations, as calculated by the manager at the valuation point defined in the deed, over all reporting periods. Investment performance calculations are available for verification upon request by any person. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The performance is calculated for the fee class. The individual investor performance may differ, as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

The rate of return is calculated on a total return basis, and the following elements may involve a reduction of the investor's capital: interest rates, economic outlook, inflation, deflation, economic and political shocks or changes in economic policy. Annualised returns are period returns re-scaled to a period of one year. This allows investors to compare returns of different assets that they have owned for different lengths of time. All period returns greater than one year have been annualised. Returns for periods less than one year have not been annualised. A cumulative return is the aggregate amount an investment has gained or lost over time, independent of the period of time involved. Actual annual figures are available to the investor on request. Illustrative investment performance is for illustrative purposes only.

Specific fund risks

- Derivatives
- Exposure to foreign securities
- Drawdown
- Liquidity
- Equities
- Bond

For a detailed description of these risks, and other risks that are relevant to the portfolio, please refer to the CIS and other Risk Disclosure Documents, available at www.cogence.co.za.

Glossary

Annualised - An annualised return is the weighted average compound growth rate over the period measured.

Volatility - Volatility (also called standard deviation) is a measure of how widely the returns varied over the period measured.

Maximum drawdown - A maximum drawdown is the maximum loss from a peak to trough of the portfolio over the period measured, before a new peak is attained.

Sharpe ratio - The Sharpe ratio is a measure of risk-adjusted returns. The Sharpe ratio reflects the extent to which an investment compensates for extra risk.

What is the total investment charge (TIC)

Total expense ratio (TER) is the percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over rolling 3 years (or since inception, where applicable), and is annualised, to the most recent calendar quarter-end. A higher TER does not necessarily imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction costs (TC) is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction Costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Calculations are based on actual data, where possible, and best estimates, where actual data is not available. Total investment charges (TIC) is the percentage of the value of the portfolio that was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.

For additional information on the portfolio, refer to the application forms, quarterly investment report and minimum disclosure documents, available on our website, www.cogence.co.za, from your financial adviser, or on request from the manager, free of charge.

The complaints policy and procedure, as well as the conflicts of interest management policy, are available on our website www.cogence.co.za. Associates of the manager may be invested within certain portfolios, and the details thereof are available from the manager. The manager has the right to close certain portfolios to new investors, in order to manage them more efficiently, in accordance with their mandates.

The Manager retains full legal responsibility for any third party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information.

- Performance data reflected in the MDD was sourced from morningstar as at 8th October 2024.
- This document was published on 15 October 2024.

Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Cogence (Pty) Ltd - Registration 2009/011658/07 - is an authorised financial services provider (FSP No 52242).
