### Performance

This investment performance is for Illustrative purposes only. The investmet is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date.

Collective Investment Schemes (CIS) are generally medium to long-term investments and are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokkerage, Strt. VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying maxer terums, the type of Fund, investment deventer factors over time including marker terums, they of fund, investment deventer deventer during the transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other from time to underlying Fund holdings. Morningstar data is updated either monthly or quarterly depending on the availability of data for each underlying collective investment scheme. The asset allocation in market movested. The performance has been calcul

A Fund of Funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 1300 (SA) to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. For any additional information such as fund prices, brochures and application forms please go to www.prescient.co.z.

The fund's risk/return profile illustrates the trade-off between risk and potential returns. Higher risk typically offers the potential for higher returns. The profile is influenced by the portfolio construction methodology aimed at achieving specific returns over time. In addition to general risks, investing in collective schemes carries various other risks including market fluctuations, external factors like natural disasters, regulatory changes, and economic developments. Investing in foreign securities adds additional risks use as liquidity constraints, currency fluctuations, political instability, and limitations on market information, particularly in emerging markets which may also entail currency controls and asset nationalization risks.

Trustee: Nedbank Investor Services. Physical address: 2nd Floor, 16 Constantia Boulevard, Constantia Kloof, Roodepoort, 1709. Telephone number: +27 11 534 6557. Website: www.nedbank.co.za.

The Management Company and Trustee are registered and approved under the Collective Investment Schemes Control Act (No.45 of 2002). Prescient is a member of the Association for Savings and Investments SA.
